

INFIELD MIXES

**Now is the time to get your fields
ready with our infield mix offerings:**

**67% SAND
12% SILT
21% CLAY
(.6 SCR)**

CLS PRO BROWN INFIELD MIX

Pro Brown is ideal for those seeking a great playing surface without the red color.

Our lowest priced infield mix. This mix will play firm and fast, but can still be maintained with moderate resources. A slightly higher clay content makes access to water necessary.

**71.5% SAND
12.5% SILT
16% CLAY
(.8 SCR)**

CLS PRO RED INFIELD MIX

Designed for recreational fields such as most high schools and little leagues that don't maintain their fields year round.

Our easiest infield mix to maintain. The higher sand content in this mix will keep maintenance requirements lower while still providing appropriate compaction and playability. Access to water isn't necessary but recommended.

**69% SAND
14% SILT
17% CLAY
(.8 SCR)**

CLS MINOR LEAGUE INFIELD MIX

Designed for high schools, colleges, and facilities with access to fairly regular maintenance.

This infield mix will play firm and fast, but can still be maintained with moderate resources. A slightly higher clay content makes access to water necessary. This mix also utilizes Kaolin clay which is regarded as the best form of clay for an infield.

**65% SAND
16% SILT
19% CLAY
(.8 SCR)**

CLS MAJOR LEAGUE INFIELD MIX

Our best infield mix designed for top of the line facilities with dedicated maintenance personnel.

Our firmest and fastest infield mix. This mix meets every specification recommended for the highest level fields. This also utilizes Kaolin clay which is regarded as the best form of clay for an infield.

HOW TO SELECT

NOT SURE WHICH INFIELD MIX IS BEST FOR YOU?

The answer to that is based off of these two questions:

1. Do you have access to water?
2. What are your facility maintenance resources/practices?

\$ - CLS PRO BROWN + PRO RED INFIELD MIX

1. No access to water
2. Requires volunteer-level maintenance

Our Pro Red Infield Mix would be the best option!

\$\$ - CLS MINOR LEAGUE INFIELD MIX

1. Access to water
2. Requires at least limited maintenance

Our Minor League Infield Mix would be the best option!

\$\$\$ - CLS MAJOR LEAGUE INFIELD MIX

1. Access to water
2. Requires regular maintenance

Our Major League Infield Mix would be the best option!

COMMON QUESTIONS

1. Is there a minimum order? No, but delivery fees apply.
2. What is a typical order? Order are typically 24-25 tons which is a full truckload. A full truckload will usually raise a field by 1/2".
3. How soon can I get some mix delivered? Normal turnaround is usually not more than a couple business days.
